

Business Intelligence as a Service

Put your data to work with our end-to-end, subscription based, BI and analytics service. Delivering the insights you need to drive your business forward.

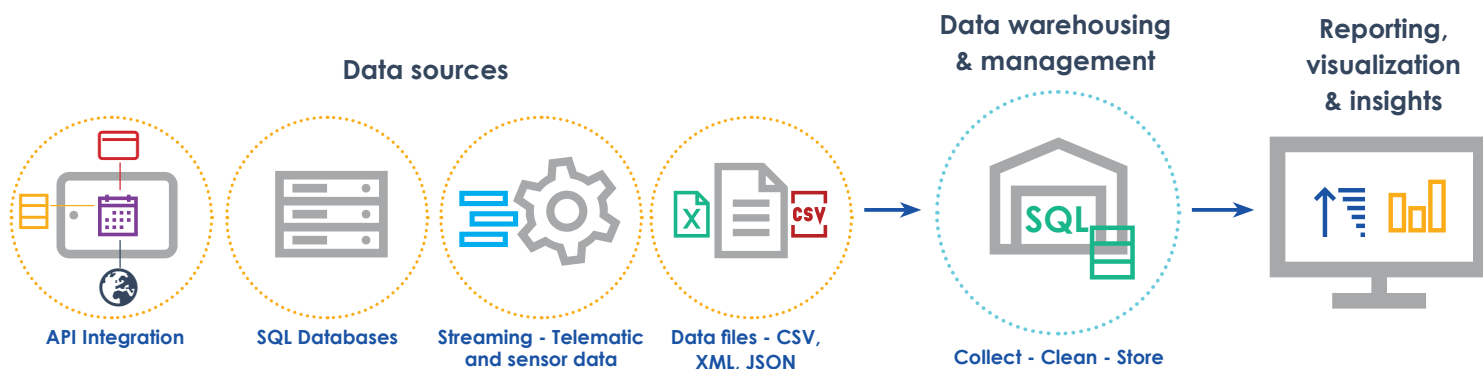

Our BI as a Service solution connects to and collects your data, integrates it into our cloud based warehouse and transforms it into simple to use dashboards, visualisations and detailed reports tailored to your specific KPIs.

Our BI as a Service solution delivers:

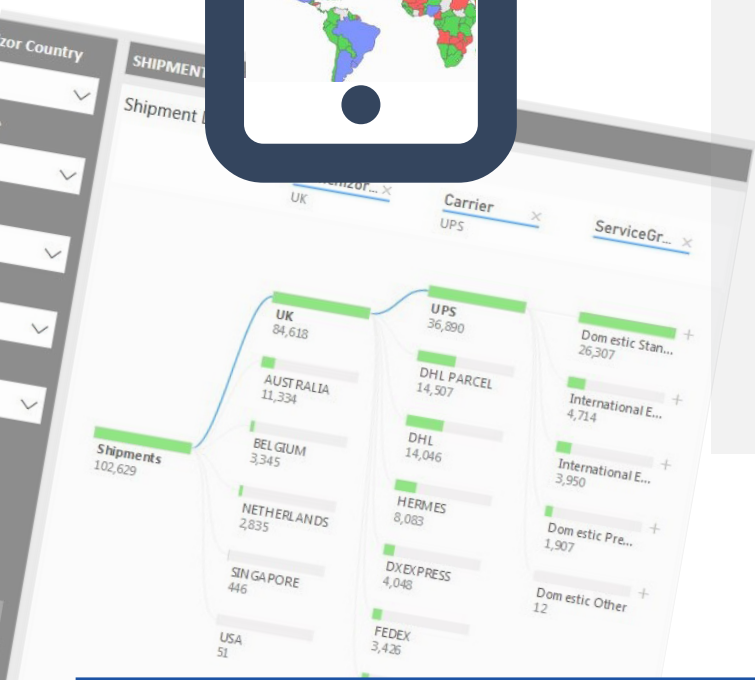

- **Customised reporting** providing an integrated overview of your business.
- **Insights** to support fact based decision making.
- **Automated analytics** delivered directly to your desktop or mobile device.
- **Reporting available to everybody** with access levels determined by you.
- **Quick to implement** with no specialist training required.
- **Clear, easy to use dashboards** with impactful visualisations and detailed drilldowns.
- **Complete end-to-end BI solution** taking care of data extraction, consolidation, storage and reporting.
- **Full security protocols** to safeguard your data.
- **Easily scalable** – adding more data sources, data volume and reports.
- **User training** and ongoing support
- **Consulting and technical advice** to help you expand your analytics capabilities.

BI as a Service Technical Architecture

Leading edge functionality for high level, consistent performance

- Supports all main data ingestion methods; file upload, direct database integration, API and streaming data.
- Full end to end and at rest encryption.
- Optional integration with Microsoft 365.
- Based on open source technologies with no vendor lock-in.
- Scalable to your business growth.
- Fully managed tech stack – no additional maintenance required.

At The Information Factory our data driven solutions are focused on putting your data to work, refining raw, disconnected data and turning it actionable insights – giving you the power to know what to do.

Our solutions automate manual processes, standardise divergent practises and create reporting, analysis and forecasting tools to help you solve your business challenges.
