Report Pro

Get instant access to your own business intelligence system with Report Pro our readily customised reporting and analytics service.

You want more time to focus on growing your logistics business and less time spent managing data? Report Pro is the automated analytics tool for you. Report Pro works equally well with commercial, operational, financial or customer information, connecting your database to a secure data warehouse to provide flexible reporting dashboards and customised KPI drilldowns; giving a clear picture of what's important to you and your business objectives.

Delivering the functionality you demand from a professional business intelligence system – at a fraction of the cost.

- **Customised reports** based on your company KPIs providing a comprehensive overview of your business.
- **Automated system** eliminating the need for manual, repetitive, time consuming report preparation.
- **Actionable insights** and decision making power derived from your data
- **Easy to use dashboards** and data visualisation tools.
- **Fast, accurate reporting** delivered directly to desk top and mobile devices.
- **Secure and cost effective** cloud based technology
- **Support and advice** to help manage your reporting expertise

Dynamic technical framework

Simplicity is key to the high performance design of Report Pro. Plus, a robust systems architecture to keep your reports and analysis running smoothly.

- Automated connection to your data.
- Secure data upload to our cloud based data warehouse.
- Data storage, aggregation, cleaning and preparation in the data warehouse.
- Front end reports delivered through MS Power BI.
